ELDREDGE LUMBER & HARDWARE SELECTWOOD

WHERE ARE WE LOCATED?

Eldredge/Selectwood is off Route 1, about 3 miles south of the Portsmouth traffic circle. Turn between Southgate Plaza and Walmart onto Constitution Ave. We're a half mile down on the left.

STORE HOURS

Monday–Friday: 7:30 am - 5:00 pm

Saturday: 8:00 am - 1:00 pm

Success is earned through hard work, a commitment to excellence and a dedication to quality and service. These are the qualities embodied, through the generations, by the Eldredge family. An unintended consequence of these attributes is inevitable growth and expansion. It is that growth and expansion which lead Eldredge to acquire Selectwood at the end of 2020. In doing so Eldredge has more than doubled the lumberyard foot print in Portsmouth also adding an Emory Jensen hardware store and a Marvin Design Gallery showroom (coming in the Fall of 2023). The unique feature about the doubling, in size, of the lumberyard is that it is all inside the building.

1-800-922-5655
SELECTWOOD.COM

Included as part of this expansion is the new 3-lane drive thru lumber yard. A drive thru lumber yard serves many purposes;

1

First, it allows us to service our customers in a climate-controlled environment, out of the elements

2

Second, it allows the customer to drive directly to the product they are purchasing for ease of loading

3

Third, it keeps our materials in a clean, dry environment, making sure customer purchases are always of the highest quality material

Eldredge/Selectwood is one of the regions first drive thru lumber yards and the latest example of the Eldredge family's drive to succeed.

WESTERN RED CEDAR

Kiln dried unless noted by **GR** (green boards that have not been dried). Net thicknesses for 1", 3/4", and 2" boards are 11/16" and 1-1/2" unless otherwise noted. **S1S2E**=one resawn face. **S4S**=four smooth faces. **D+Better**=considered clear, but allows more occasional knots. **FJ-PP**=finger-jointed, pre-primed board. * *Call for availability.*

REAL CEDAR

TruExterior®

Siding & Trim

TruExterior® Siding & Trim is a true innovation, invented to address issues common with other exterior products in the industry. It's a siding material that offers a high level of dimensional stability to help reduce expansion and contraction. Plus, TruExterior resists water, making it ideal for applications with ground or masonry contact.

60 LIBERTY STREET

The process of building or renovating a home can be a nerve-racking experience for a homeowner, always challenging for the builder, and a moment of untethered inspiration for an architect. For Michael Graf, a Newmarket, New Hampshire-based architect and builder, “the process” is everything. On most projects, he is engaged as the architect first and foremost, but as the drawings and the architect-client progresses, he may accept an offer, or show an interest in becoming the builder as well. For Michael, this very special arrangement only happens when his

relationship with the client is in sync and the vibe is one of mutual respect and trust. The success of this remodel/renovation on Liberty Street in Newburyport depended on just such an arrangement.

The house was built in three sections, spanning over a hundred years from the “original” street front structure to the ‘80s addition in the back. The last two sections had been given less attention to the space underneath than the original section which had, at least, a partial basement. At a mere sixteen feet in width, homeowners Cynthia and Paul knew the only way to gain more space in the two story home was by going down.

One of the unique perspectives Michael had as the builder, was not being constrained by a schematic design as he encountered unexpected challenges. He could address the issues directly in the building process, and consequently note it in his construction drawings as they happened. One notable example of this occurred at the basement level. The actual, finished foundation narrowed the space by mere inches, but did require some creative problem-solving as to how the metal and wood fabricated stairs would land in the basement.

Continued on page 26...

PVC BOARDS & SHEET STOCK

Composite or cellular PVC trim boards continue to gain acceptance as an alternative to traditional lumber products in exterior applications. In general their resistance to rot and deterioration coupled with superior long term finish retention have made them the product of choice for harsh exterior conditions. *Call for availability.

AZEK TRIM

The leading brand of cellular PVC, has an **AZEK** Trim unequalled combination of uniformity, durability, workability and beauty. Call for quantity discount. Priced per linear foot.

Order your free samples at [TimberTech.com](https://www.timbertech.com)

TimberTech®
EVERYTHING WOOD SHOULD BE™

*TimberTech Advanced PVC decking comes with a Limited Lifetime Warranty and a Limited 50-Year Fade & Stain Warranty.

BEVEL & LAP SIDING

Wood clapboards define historic architectural styles found in New England. Clapboards are manufactured with a beveled or tapered side profile. Either face can be exposed to the weather as one side is generally smooth and the other face is textured. Composite products are developed from fiber cement and wood composites. Their profiles are similar to traditional clapboards. For custom primer and topcoat colors, call for minimum order size and lead times. **Please call for availability and current pricing.*

HardiePlank

Fiber cement engineered with an exclusive HZ5 formulation for cold weather climates. HZ5 resists damage from ice, snow and freezing rain. Standard lengths are 12' with smooth or Cedarmill Mill textured finish. Available primed only or with a warrantied one or two coat exclusive Colorplus factory finish.

* 5/16" x 5 1/4" (4" Exposure)	Call
* 5/16" x 6 1/4" (5" Exposure)	Call

WESTERN RED CEDAR SHINGLES & SHAKES

Western Red Cedar Shingles and Shakes are unsurpassed for their natural beauty and durability combined with high insulation value which helps reduce energy costs. Shingles and shakes are available in a multitude of shapes, sizes, styles and surface treatments to fit a vast array of project requirements. Whenever possible, Selectwood will stock and distribute shakes and shingles with the "Certi-label" indicating the products have been graded and manufactured to the high standards set by the bureau. Call for pricing, availability and additional literature.

Shingles

Western Red Cedar shingles are typically bundled green and are used mainly on roofs and some side wall applications. These shingles are sawn to exacting standards yielding relatively smooth even surfaces.

Boxed R&Rs

R&Rs are kiln dried shingles which are trimmed with parallel edges with the butts sawn at right angles. R&Rs are dimensionally stable. Typically they are packaged in boxes rather than bundles. They are the preferred shingles for indoor applications and are typically used on exterior walls and not on roofs.

Shakes

Handsplit Shakes are thicker than shingles and more rustic in appearance. Shakes are split on the exposed face rather than sawn on both sides yielding a natural grain, textured look. Generally handsplit shakes are used on roofs creating a distinctive bold appearance. Most sizes and grades are available fire or pressure treated. Call for availability, typically 5 business days.

Tapersawn

Western Red Cedar Tapersaws are similar to a shake that has been sawn on both sides. They are not as thin and precise as a shingle. They are used on roofs and some side wall applications. Tapersawn Shakes have a bolder appearance with a thick butt.

ALASKAN YELLOW CEDAR

Alaskan Yellow Cedar or Western Cypress has gained popularity with discerning builders due to its unique properties and durability. Yellow Cedar will weather to a lighter more silvery gray than Western Red Cedar. It possesses a distinctive yellow color combined with a unique aroma. It is characterized by tight growth rings and fine straight grain. It is extremely durable and a great alternative especially to Eastern White Cedar for roof applications. It is graded to the same exacting quality control standards by the Shake and Shingle Bureau. * Call for availability.

TIMBER & BEAMS

Selectwood specializes in beams and timbers in structural and appearance grades. If we don't have a grade or size in stock we can generally have it in four to ten business days. If the grade or size isn't listed please call us. **All lumber prices are per linear foot.**

Western Red Cedar

Highly sought after for beautiful appearance grade timbers. Western Red Cedar is often used for outdoor applications where stability and resistance to rot and decay are desired. *See Page 4 for a complete listing of Cedar Timbers.*

Douglas Fir

Known for extreme strength as well as wonderful appearance qualities, Douglas Fir has been a staple for Selectwood's beam and timber business throughout the years. *See page 6 for our listing of clear Douglas Fir timbers.* Always call for quantity pricing.

Bold. Beautiful. Refined.

Classic Composite Series is a simple system with endless design options and the look and feel of real wood. It uses a Universal Rail and offers five top rail options including Premier Rail®, RadianceRail®, Trademark Rail™, Drink Rail, and Contemporary Rail*. Plus, there are three NEW, high-performance matte colors: Matte White, Matte Black, and Matte Espresso that offer a modern complement to TimberTech decking. These new colors feature an upgraded material technology, all backed by a new 25-Year Fade & Stain Warranty. Designed for the homeowner who wants an impactful railing design that will last for decades.

- 4-sided synthetic cap covers the backside,

grooves, and composite core

- 25-Year Limited Product Warranty with the three new matte colors boasting a new 25-Year Fade & Stain Warranty
- Extremely durable and low-maintenance
- Unbeatable resistance to mold and mildew keeps railings from rotting, splintering, cracking, or warping
- Advanced resistance to scratches, stains, and insects

*Black or Traditional Walnut colors available for top rail ONLY. Please note that these colors are slightly different from the five Classic Composite colors and will not be an exact match.

Post caps are sized to fit a range of nominal dimension lumber:
4" x 4"=3 3/8" x 3 5/8", 5" x 5"=5 1/4" x 5 1/4", 6" x 6"=5 5/8" x 5 5/8"

60 LIBERTY STREET

(Continued from pg. 7)

Another situation that could not be planned for before it was in the construction phase was how the screen for the Marvin Multi-Slide doors and their screens would be installed.

Without question, the impressive back of the home, which is decidedly modern, could only be accomplished by leaving 80% of the rest of the home as close to its original state as possible, which meant not changing rough opening sizes for existing windows and adding only a very small side entrance. Any additional windows or installing larger replacements would be considered “demolition” and would be square footage that could not be banked on to accommodate the wall-to-wall sliding door on the first and second floors. As a matter of fact, it was hoped to extend the glass on the back wall to the peak, but the percentage of

“demolition” would have been exceeded so the eye-popping Alaskan Yellow Cedar was used to make a bold and attractive statement.

The thought-provoking interior details were also a collaboration of Michael and the owners. The contemporary kitchen cabinets, with no wall hung units, the partition-like cabinet / closet / fireplace on the first floor sitting area and living room, the basement sauna, and the rest of the cabinetry and wood design details in the house were custom made by Michael and master craftsman, Dan Chouinard, many of the pieces being fabricated in their fully equipped, Newmarket, New Hampshire workshop.

Eldredge / Selectwood provided most of the specialty lumber used on the project and the millwork, Marvin windows and doors, and Wallaba roof shingles were specified by Michael’s rep at Selectwood, Bert Raymond.

The appeal of this relatively small home is the thoughtful design, perfectly proportioned, which makes the building appear larger than it is. From the outside, it is not so obvious, but the success of the Liberty Street project rested on the keen eye of the architect, the skills and patient temperament of the craftsmen, and Michael’s collaboration with his client, carefully listening, adapting, and bringing their vision to life.

“ It looks authentic
and like beautiful
wood—we love it! ”

Amy Romfo | Charleston, SC
Author of the Coastal Oak Blog

A coastal environment can wreak havoc on a home's exterior. So when Amy Romfo needed to replace her wood porch, she turned to TimberTech. With superior performance and the most natural, real wood aesthetics in the industry—plus a lifetime warranty*—she knows she will never have to worry about her deck again.*

Order your free samples at [TimberTech.com](https://www.timbertech.com)

Make A Lasting Impression

The solid, authentic, high-end look of real cedar siding, with none of the problems of real wood, engineered wood, or fiber cement.

7" Lap Siding

4 1/2" Lap Siding

- Less than half the weight of fiber cement
- Produces no harmful dust like fiber cement
- Requires no specialty tools to install
- EZStack joinery speeds lap siding installation and ensures level with consistent course spacing
- Convenient EZNail® fastener slots on lap nailing hem every 8" O.C.
- Stainless steel seam brackets ensure the tightest lap siding seams
- No seam flashing, priming, caulking, or painting required
- The 1-piece Board & Batten panel features a 2" batten and 9" board
- Premium Color-Matched Trim Available
- The color palette includes deep, rich hues. Ask about product availability.

The Everlast Siding palette* – including deep, rich hues – has been thoughtfully curated by color consultants to complement any style of home, regional preference, as well as both current and classic color trends.

NOTE: Colors may not be exactly as shown due to printing limitations. Consult a product sample before final selection. *Contact your Everlast dealer for product availability.

Everlast®
Composite Siding

11" Board & Batten Siding

TOREM EXTREME

Your best alternate to Ipe!

Torem has been used in the Australian and New Zealand market for 40 years as decking and window parts.

COLOR: The heartwood is brown, dark brown or reddish-brown, sometimes with reddish streaks, and more or less lustrous.

GRAIN: Usually straight to interlocked

TEXTURE: Fine to very fine. Super clear — 4 smooth surfaces

GRADE: Clear 2 face — reversible

DURABILITY: The timber is rated as durable (Durability class 2) in contact with the ground or weather; it is resistant to fungal and insect attack

WEATHERING: Uniform patina gray after time

Common Name	Dark Red Meranti	Red Balau	Ipe	Torem
Average Dried Weight	42	53	69	69

Mouldings

Selectwood (Poplar)

Made out of the highest-grade poplar, our unique, solid mouldings will add beauty to any room. We can accommodate custom profiles and radius work. Most profiles are primed.

PVC Mouldings

Made of high-grade PVC which gives them superior paint-holding characteristics and a longer life. They will not deteriorate in hostile exterior applications.

Harbor Light Collection

Made exclusively for Eldredge/Selectwood, this collection of superior Sher-Wood primed poplar moulding includes twelve distinctive profiles that may be assembled together to create as many as 40 impressive build-ups.

Economical Interior Trim

Selectwood offers distinctive cost effective mouldings from clear kiln dried finger jointed pine for interior applications. They are primed to a superior smooth finish, ready to install with minimal prep work.

Britton Lumber
Company

P5 TRIM LIVES UP TO ITS NAME!

If you prefer wood to plastic, permanence to decay, solid wood to finger jointing, oil paint to latex and well managed forest plantations to oil wells, then P5 was made for you.

- Sourced from well managed plantation forests, sustainably grown in New Zealand.
- Azole based pressure treatment
- Paint Ready Finish

- A 30-year limited transferable warranty
- P5 is made from solid Radiata Pine, no finger jointing, creating superior durability and longevity.

YOUR DECK DESERVES DARK RED MERANTI

Prized by European architects for high-class joinery applications, these species provide the ultimate combination of beauty, versatility, performance, and economy for decking and related products. They mill to a superior surface, work easily, absorb, and hold finish deeply and evenly. Our timber ages to a smooth surface, with less checking (cracking) than other harder, heavier, and more expensive species.

All Blue Star products, and the facilities where they are manufactured, are 100% certified by the Malaysian Timber Certification Council, under the MTCS (Malaysian Timber Certification Scheme). In 2009, MTCS was granted the prestigious endorsement of the Programme for the Endorsement of Forest Certification (PEFC).

EB-TY Premium Hidden Deck-Fastening System

With integrated stainless-steel plate for added strength. For use with 3/4" or thicker material.

¼" Space 175 pc kit	\$111.66
⅜" Space 175 pc kit	\$111.66
½" Space 175 pc kit	\$111.66
Quick Release ⅜" Drill bit	\$10.83
Guide Pre-drill Tool	\$14.16

Camo Fastening System

The Camo Fastening System uses a unique jig that angles deck screws nearly invisibly through deck board sides. Choose coated, rust-proof Protech or stainless steel screws.

Camo Grooved Driver Bit	\$5.37
Camo Marksman Narrow Board	\$62.96
Camo Marksman Pro	\$52.46
Camo S4S Driver Bit	\$3.56
1⅞" Protech Coated Screw, 350 pc	\$24.71
1⅞" 316 Stainless Screw, 350 pc	\$56.61
1⅞" Protech Coated Screw, 700 pc	\$41.21
1⅞" 316 Stainless Screw, 700 pc	\$105.30

HIDfast Fastening System

The fastest, easiest system to get a fastener free appearance in composite decking. Collated, stainless steel hidden fasteners.

Pneumatic decker	\$262.50
HIDfast fasteners, 175 pc	\$127.50

DuraLife

The Step-Clip System installs easily with a roofing nail gun or hammer, then simply step on deck boards to snap them into place! Deck installation has never been so simple, safe and secure!

Step-Clip w/coil nails, 150sf	\$193.88
Step-Clip w/hand nails, 150sf	\$193.88
Step-Clip w/coil nails, 50sf	\$79.05
Step-Clip w/hand nails, 50sf	\$79.05
Fastener 100 ct kit, 60sf@16"oc	\$85.50
Fastener 500 ct kit, 300sf@16"oc	\$330.00
Cortex, 100lf, 224 sc/300 plugs	\$83.25
Endcaps, 20 ct	\$20.50

Ipe Clips

Ipe Clips will fasten on most tropical and composite decking ¾" and thicker. With up to three times the holding power of other hidden fastening systems, they will enhance the beauty of deck surface. Using Ipe Clips, deck boards are automatically spaced properly with the gap determined by the clip type.

Extreme, 175 pc	⅜" Spacing	\$109.50
Extreme KD, 175 pc	¼" Spacing	\$109.50
Extreme 4, 175 pc	⅝" Spacing	\$109.50
Ipe Plug Kit, 350 pc	⅜" Diameter	\$123.38
Combination Drill & Drive Kit		Call

STARBORN PRO PLUG SYSTEMS

Pro Plug systems for invisible fastening. Uses matching plugs for PVC trim boards, wood and PVC decking.

305 Stainless Screw Kits

CableRail Infill Options

CableRail Kits (Wood)

CableRail Kits are the most popular and cost-effective solution for wood railing frames and include everything needed to attach and tension a cable. They're designed for frames where there is access to drill through both end posts allowing the fittings to anchor to the outer faces of the posts.

ACRE™ BY MODERN•MILL

THE NEW EVOLUTION OF BUILDING MATERIALS

*ACRE elevates building
materials to a whole new level.*

ACRE isn't wood. It isn't a traditional composite. It's a brand-new material engineered from rice hulls that combines convenience, durability, beauty, and sustainability.

With less static or dust than PVC, ACRE is easy to stain or paint, has smooth edges and a limited-lifetime guarantee, ACRE raises trim, decking, millwork and siding to a whole new level.
