

FIBERGUTTER®

V4.4

www.fibergutter.com

FiberGutter Introduction

FiberGutter specializes in manufacturing, distribution and installation of fiberglass gutter for residential, municipal and commercial projects.

Our focus is to provide a rain gutter that lasts longer, functions better and contains an overall sustainability versus any other related products in the gutter market.

FiberGutter is a result of almost a century of combined experience in both the marine and construction trades. We have manufacturing facilities in Pennsylvania and Massachusetts.

While we cannot predict the future we are sure of one thing, if it carries the FiberGutter name, expect a product with unsurpassed quality, cutting edge innovation, and superior performance.

About FiberGutter

What is FiberGutter?

FiberGutter is a polyester resin based fiberglass gutter that is manufactured through a mechanical process called [pultrusion](#). Years of development went into creating a product that is more consistent, smoother, less expensive and more durable than previous counterparts manufactured by hand.

What are the Benefits of FiberGutter?

Aesthetics-Fiberglass Gutter has the appearance of traditional wood gutter

Capacity-Fiberglass is comparable to other materials in terms of capacity

Maintenance-Fiberglass Gutter requires almost zero maintenance except cleaning and cover options are available

Strength-Fiberglass Gutter is by far the strongest gutter available

Longevity-Fiberglass Gutter carries a 50 Year Warranty

Where Can I purchase FiberGutter?

FiberGutter is available through a dealer network and directly to contractors and home owners outside of the dealer network throughout the United States and Canada. We ship throughout the United States, Canada and the Caribbean. We also have a list of approved installers that have been trained on the complete installation process by our staff.

FiberGutter FAQ

What Length is FiberGutter Manufactured?

Our Fiberglass Gutter is manufactured in 16', 24' 27'6" & 40' lengths.

What Other Accessories do I Need with FiberGutter?

We have a complete list of accessories on our [MEASUREMENT FORM](#)

Can my Contractor Install FiberGutter?

Yes, we have painters, exterior contractors, general contractors, carpenters and handymen install FiberGutter. We even have the DIY homeowners purchase gutter and accessories to successfully install themselves.

How is FiberGutter Attached to the Fascia Board?

The fasteners is a 3 inch 316 Stainless Fastener that should be screwed into the back of the gutter at every rafter end. NO Brackets to clog the gutter!

What Profiles are Available?

We have the standard 4x5 and 4x6 replicas of the Boston Proper Wood Gutter.

We recommend installing a PVC molding below the gutter at the time of Installation to achieve your desired appearance.

How Do I cut FiberGutter?

We recommend using a Standard 10" or 12" Miter Saw with a Carbide Blade or Diamond Blade. See complete [INSTRUCTIONAL VIDEO](#)

What color is the gutter?

The gutter is manufactured in a UV protected white resin and can be painted with any latex paint. Most contractors will paint the gutter along with the trim. Paint on fiberglass can last 5 times longer than paint on wood

How are the seams assembled?

We have created a system to simplify the entire installation using our proprietary product called Gutter-Glue.

FiberGutter Accessories

Part: FG2P10

Instant Fiberglass Adhesive, Two Part, Adhesive Kit

2P-10 is used to temporarily hold together end caps seams and miters before the GutterGlue is applied.

This is a great tool to simplify your installation.

2P-10 is a two-part ten-second adhesive. Just apply the adhesive, then spray the activator and stick it together for a strong, permanent bond.

Part: FGGG220

GutterGlue

GutterGlue is used to seal miters, seams, endcaps and outlets. It comes in a kit which contains the glue, tongue depressors, mixing tips, KEVLAR® Tape (only required for seams and miters) and 36 Grit sandpaper.

Permanent unitizing structural adhesive, UV inhibitors, rapid curing, two-component adhesive formulated and colored for FiberGutter applications, fast setting, easy to apply.

FiberGutter Accessories

Part: FGEC1

Fiberglass End Cap (4x5)

The FiberGutter End Cap helps prevent water from escaping from the end of a gutter. The end cap has a white finish and a durable fiberglass construction.

Helps prevent water from escaping from the end of the gutter

- Fiberglass construction
- White Finish
- Paintable
- Use at the end if a fiberglass gutter run
- Requires GutterGlue to complete installation

Part: FGEC2

Fiberglass End Cap (4x6)

The FiberGutter End Cap helps prevent water from escaping from the end of a gutter. The end cap has a white finish and a durable fiberglass construction.

Helps prevent water from escaping from the end of the gutter

- Fiberglass construction
- White Finish
- Paintable
- Use at the end if a fiberglass gutter run
- Requires GutterGlue to complete installation

FiberGutter Accessories

FG238

FiberGutter PVC Outlet

The FiberGutter Downspout Outlet can be used to direct water from the gutter into the downspout. Featuring durable PVC construction, this downspout outlet can be used with any type of downspout. GutterGlue and a 2-3/8" Hole Saw is required and to install.

- PVC construction for durability
- Directs water from gutter into downspout
- To install, cut a hole in gutter and insert outlet
- GutterGlue required for installation

FGSCREW3

Structural Fastener

The FiberGutter structural screw is made of stainless steel to provide you with tensile, torque and shear strength. The sharp threads and points bite instantly into the back wall of FiberGutter without having to Pre-Drill. The round head with built-in shield (washer type head) has no sharp edges like conventional lag screws. All structural fasteners carry a lifetime warranty.

www.fiberglassutter.com/about

Fiberglass Gutter & Downspout

FiberGutter® brand Fiberglass Gutter will never chip, dent, corrode, leak or rust.

Unmatched Durability & Strength
The strength of these fiberglass gutters provides unmatched impact resistance and virtually zero expansion and contraction eliminating maintenance, moisture damage, and rotting associated with other gutter materials.

Fiberglass is highly UV stable, and significantly more impact resistant than vinyl, aluminum and copper gutters.
